

Following the principle of combining theory with practice and proceeding with practical problems, this book explains relevant methods to solve practical problems. Meanwhile it highlights the application of the basic contents of Business Economics in practice so that the entire contents are close to the practice of business economic activities. It tries to shorten the internalization process of knowledge and ability, which is conducive for students to form the basic idea in the process of enterprise economic activity and improve enterprise economic quality of the educated. Fully supported by the reference to relevant textbooks and materials, the author based on his own experience of economic management operation. Paying respect to the students cognitive characteristics and according to the disciplinary knowledge structure and the students cognitive rules in the learning process, the author divided the book into five parts of 15 chapters: Basic business theory, Corporate form of organization, Corporate production operations and decision-making, Corporate growth and development, and Corporate external environment. The chapters are compact and logical in content, which is helpful for students to form the systemic cognition of functioning of enterprises.
